

Introducing the new 1960DM Dave Mustaine Signature Cabs

Marshall Amplification are pleased to announce the release of the Marshall 1960DM Dave Mustaine Signature Cabinet.

Two Legends, One Voice

In 1962, a new amplifier became available to guitarists, bringing with it a whole new approach to how the guitar was played. Not only that but a new concept in speaker cabinet design was emerging from the same company; a single cabinet containing 4 x 12" speakers, that could be 'stacked' on top of one another. The company behind this was Marshall Amplification, and the visionary Jim Marshall.

21 years later, in 1983 a new band emerged on the San Francisco bay area, bringing with them a unique, new sound for a generation. The music had a distinctive guitar style, often involving complex, intricate musical passages. The lyrics were profound and gave a sharp, cynical view of modern society. The band Megadeth, the visionary Dave Mustaine.

"When I was first starting off playing guitar, everyone I looked up to was playing Marshall Amps..." – DSM

"Over the years we have worked on some fantastic projects, but we have never enjoyed an artists involvement in a project quite so much as when we worked with Dave Mustaine on developing his 1960DM Signature Cabinet"
– JCM

Range & Features

The Dave Mustaine signature range consists of two cabinets, the 1960A-DM, which carries the classic angled look, and the 1960B-DM, the base, straight front cabinet. Together they make one hell of a stack!

Hand built in our UK factory the development engineers have worked closely with Dave over the last year, and have devised our most visually and sonically striking product to date. Hand-sealed for an enhanced response, the baffle is fixed inside the cabinet housing and loaded with G12-V30 Marshall Celestion custom Dave Mustaine Vintage Speakers. This 'sealed' construction gives tightly focussed, aggressive projection to the sound and is exactly to Dave's specification.

Cosmetically, the cabinet looks like no other. Built with 15mm Birch Ply, the cabinet has a more open face look, with a diamond pattern, black powder coated steel kick grille to protect the speakers. Covered in rugged "Carbon Fibre" patterned, slate black vinyl, the cabs are finished with high impact-resistant cabinet fixtures and durable Manganese-Phosphate plated screws and rivets. The final touch is a custom plaque in the corner of the cab, carrying the signatures of both Dave Mustaine and Dr. Jim Marshall OBE.

Extras

Included with each 1960DM cabinet is a DVD presented by Dave and featuring the building of the cabinet. There is also a heavy duty dust cover with a custom artwork and a product completion certificate hand-signed by the Marshall Production staff.

1960DM Features:

Cabinet type:	Angled (A) and Base (B). Hand sealed for an enhanced response
Speaker type:	G12-V30 Celestion Marshall Custom Dave Mustaine Vintage
Speaker configuration:	4 x 12"
Power (RMS):	280 watt
Selectable (Mono/Stereo):	Yes
Mono Impedance:	16/4 Ohm
Stereo Impedance:	8 Ohm
Dimensions (mm):	770 x 755 x 365
Weight (Kg) Angle:	43
Weight (Kg) Base:	44

Available April 2009 please contact your local Marshall dealer for delivery and pricing.
